The concept séries:

A light trailers , economic and multi-purpose

A Unique truck: Concept

"light and Strong"

The concept series has been studied to be the lightest trailer of the market and it's done

"for you that's less unladen weight and more load"

A current 3axles trailer unladen weight is arround 11T for 32Ttotal weight wich allow you 21T of load

The Concept 3 axles trailer is only arround 7T unladen weight that's allow you 25t of load.

You don't spare time and money carrying steel and

your carriage a much more efficient.

La C320

Length: 7m90 width: 2m30 side height: 1m70 Extensions: 25cm

Volume: 34m3 with raise 25 cross weight: 32 T

Axles size: tridem 130

Series: hydraulic door with compressor and hydraulic descent

Backward follower of series the second optional

La C320 Volumix

Length: 7m90 width: 2m30 Side height: 1m70.volume : 34m3

Block raise 80 (option) 50m3 silage

Height of optimized fall cross weight : 32 T

Axles: tridem 130

Series: hydraulic door with compressor and hydraulic descent

Backward follower of series the second optional

La C290

Length: 7m Width: 2.30m Side height: 1m70 Extensions: 30cm

Volume:30m3 with raise 30 cross weight: 29T

Axles: tandem 150

Series:hydraulic door with compressor and hydraulic descent

Follower of series

La TP CONCEPT

Length: 5.48m Width: 2.30m Side height: 1m

Volume:12 m3

Axles: tandem 130

Brake:406*120

Base and sides thicknesses THLE according to the use

Le PU 21

Length: 12m

width: 2m54

Echelettes: right

Axle AV: square 100

Axle AR: Tandem square 100

Payload: 20.7 T

Profile of frame:

IPE 400

Le PU 9

Length: 9m

width: 2m54

Echelettes: inclined

Axle AV: square 80

Axle AR: square 80 on spring

Payload: 10 T

Profile of a frame:

IPE 300

Naturallys 17 Naturallys 20

Length: 5m70

Length: 6m50

Volume: 17 m3

Volume: 20 m3

Wheels: 23.1R26

Wheels: 650/75R32

Spreader Naturallys saw their weight optimized for a better working comfort. Their simplified forms what facilitates the cleaning Thickness turns: 10mm steel handled

Drive shaft with steel landings handled brakes: 406*120

Série confort livestock vehicle

The new livestock transporter confort propose many advantages :

- A volume optimized by 25% without any asperity

which improves the safety

and the confort of animals during the transport.

-A bottom under grating which avoids

the slidings of animals and facilitates the cleaning.

-The load of animals is facilitated thanks to its systeme

of putting on the ground without wings inside

and the total opening of doors .

-The road confort improved by the presence of a hydraulic accumulator .

-The livestock transporter confort is available in 2 size :

6m50 8 m and in two colors green or yellow . Width:2.54m

The competence of the men

a guarantee of quality.
